📄 PROFILE

Results-driven Full-Stack Developer with hands-on experience rebuilding production websites and engineering business automation pipelines. Recently completed a Frontend Developer internship at Show Not Tell, leveraging React, Next.js, and low-code tools (n8n, Zapier, Make.com) to streamline operations. Equipped with a rigorous, two-year Full-Stack training foundation from the Digital Career Institute, combined with specialized expertise in AI-driven process automation. Passionate about writing clean, efficient code, building robust APIs, and creating seamless user experiences.

🧠 SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

Frontend Development: React, Next.js, Vue.js, SCSS/SASS, Tailwind CSS, Responsive Web Design

Backend Development: Node.js, Express.js, REST API Development, CRUD Architecture, PostgreSQL, MongoDB

Tools & DevOps: Git, GitHub, Docker, CI/CD Fundamentals

Automation & AI: Workflow with N8N, Zapier, Make.com, Airtable, | AI-powered process automation

🌐 LANGUAGES

German: B1 level (actively improving)

English: native/bilingual

Edo: native/ bilingual

🎓 EDUCATION

AI and Automation Training, DCI Digital Career Institute GmbH

10/2025 – 10/2026 | Berlin, Germany

- Workflow automation with modern tools
- AI-supported development and automation systems

Full-Stack Developer Program, DCI Digital Career Institute GmbH

07/2024 – 05/2026 | Berlin, Germany

- Training in modern web development technologies
- Building full-stack web applications using JavaScript, React, Next.js, and Node.js
- Integration of REST APIs and databases
- Collaborative development using Git and agile practices

Biology, Edo Technical College

2005 – 2009 | Benin City, Nigeria

📁 WORK EXPERIENCE

Frontend Developer Intern, Show Not Tell

03/2026 – 05/2026 | Bremen, Germany

- Rebuilt and optimized client production websites using React and Next.js to improve performance and UI/UX.
- Designed and deployed automated business pipelines utilizing n8n, Zapier, and Make.com to reduce manual administration.
- Collaborated closely with the design and development teams to translate wireframes into high-quality, responsive code.

Warehouse Forklift Operator, MPG Logistics

07/2021 – 12/2023 | Menden, Germany

- Managed warehouse logistics operations in a fast-paced environment
- Ensured efficient loading, unloading, and storage of goods
- Maintained safety and operational efficiency within the warehouse team

Business Assistant, Odia Factory

07/2009 – 07/2015 | Benin City, Nigeria

- Assisted in day-to-day business operations and administrative tasks
- Coordinated workflow and supported operational processes

📁 PROJECTS

JOM — Mechanic Workshop App,

- Co-built jom-gamma.vercel.app, a full-stack automobile workshop management app with a three-person team.
- Developed frontend with Next.js and TypeScript, and backend including user authentication, booking system, mechanic profiles, car brand listings, admin dashboard, and contact form.
- Built and managed PostgreSQL database, designed schemas, and REST API endpoints, deployed on Render.
- Deployed frontend on Vercel.

Developer Portfolio Website, murphy1.onrender.com

- Built a personal developer portfolio to showcase projects
- Implemented responsive design and modern UI components
- Deployed using cloud hosting platforms

ShopHUD - E-Commerce Web Application, shophud-frontend.onrender.com

- Developed a responsive e-commerce frontend using React and TypeScript
- Implemented reusable UI components and product pages
- Integrated REST APIs to retrieve product data
- Designed responsive layouts for desktop and mobile devices

Business Workflow Automation Tool

- Designed and deployed automated business workflows using n8n
- Built AI-powered pipelines to reduce manual data processing tasks
- Integrated third-party APIs to streamline multi-step business processes
